

PMS Enhancement Requests Prompts

Student Login & Profile

1. On student login (via registered email), fetch and auto-populate the profile with the student's actual data from the uploaded CSV , currently showing dummy data even though the welcome message name is correct.
2. Add "Phone Number" as a mandatory column (10-digit validation) in the student details CSV upload template.
3. Make "Alternate Mobile Number" a mandatory field on the student profile.
4. Replace the single cumulative CGPA field with semester-wise CGPA entry, supporting UG and PG separately.
5. Display maximum file size (5 MB) and accepted formats (PDF, DOCX) on every document upload field, starting with Marksheet upload.
6. Replace per-role resume uploads with one master resume per student. Capture role-specific info separately, and use an AI agent to auto-generate a standardized resume per selected role from the master resume + role inputs.

Placement Input Form (PIF)

7. Add field-level error flagging on the PIF , highlight incorrect/missing fields with a specific inline message instead of a generic failure on submission.
8. Fix PIF approval workflow , once a Delivery Head approves a form, the record isn't being saved to their profile. Ensure approved PIFs persist and show under the Delivery Head's history.

Drive Cockpit

9. Extend Drive Cockpit access to both Delivery Head and Account Executive roles, with appropriate permissions.

Authentication

10. Fix login/logout , currently not working for any user role. Ensure secure session handling and proper logout redirection across all roles.

Placement Coordinator

11. Fix the non-clickable "Publish" button under Publish and Target , restore functionality so coordinators can publish targets.

18/08 - PMS Feedback (Abhishek)

Position Information Form (PIF) Feedback

- JD upload (PDF attachment) needed: companies send JDs and these should be attached to the drive
- Shift timings: should use IST time fields (e.g., 9–5), not free text or day/night dropdowns
 - Inconsistent formats make data unusable
- Offer rollout and joining timeline: needs a dropdown (e.g., “Immediate” or “Later”) plus a comment box
- Bond/service agreement fields: rarely relevant for internship-focused drives, not mandatory
- Multiple designations for same company: only one PIF raised (Karthik’s design decision)
- Date field: only accepts hyphens, not slashes; caused confusion during demo

Zoho CRM Integration Concern

- Risk of double data entry: AEs fill deal details in Zoho, then re-enter same info in PMS
- Data mismatch risk: e.g., 5 openings entered in Zoho vs. 3 in PMS, with no reconciliation owner
- Abhishek’s suggestion: auto-fetch PIF details from Zoho (via Google Sheet or direct integration) to avoid duplication
 - Email notifications when deal status changes or drive moves forward

Role and Access Design

- Abhishek’s proposed model: one dedicated ERT/KAM person coordinates with Radhik (delivery-side ERT) instead of the whole AE team using PMS
 - Avoids entire team spending time on drive creation
- Key account managers (campus-side): can view campus overview only, cannot publish drives
- Central placement coordinator: sole authority to publish drives
- Student view: shows open drives, application status, and placement result
 - Placed students cannot see new drives

19/08 - PMS Feedback

1. **Job type visibility** Job type (Internship / Placement / Internship-Convertible) should be displayed alongside the company details in the PIF, not buried elsewhere in the flow.

Conditional compensation field The compensation field should immediately follow job type selection, and adapt based on the selection:

- Internship-only roles → show **Stipend** only
- Internship-convertible roles → show **Stipend + CTC**

Reordered Company Details section Proposed field order for the Company Details section: Job type → Role title → Number of openings → Work location → Min/Max CTC → Eligibility

This section should be followed by the Selection Process & Timeline section.

Mandatory company contact details Each drive must capture the company contact's **name, designation, and contact details**. If left blank, the Central Placement Coordinator (CPC) becomes the default point of contact for that client.

Multiple contacts per company Add a "+" button to let users add multiple contacts for the same company, so the CPC has alternate contacts to reach if needed.

The screenshot shows the 'Position Information Form' in the FACE Prep CAMPUS system. The interface includes a sidebar with 'Drive initiation' and 'Position information form' (selected), and a main form area. The form is titled 'Position Information Form' with a subtitle 'Raise a new drive. It goes to the Delivery Head for approval.' The form is divided into two main sections: 'Company details' and 'Contact details'. The 'Company details' section includes fields for 'Company name' (filled with 'Accenture'), 'Industry / domain' (filled with 'Technology'), 'Company website', 'Contact designation', and 'Contact phone'. The 'Contact details' section includes fields for 'Contact name' and 'Contact email'. The form is styled with a light blue header and a white body, with a dark blue sidebar.

ACCOUNT EXECUTIVE

Drive initiation

Position information form

Drives

Position Information Form
Raise a new drive. It goes to the Delivery Head for approval.

Company details

Company name: Accenture

Industry / domain: Technology

Company website:

Contact designation:

Contact phone:

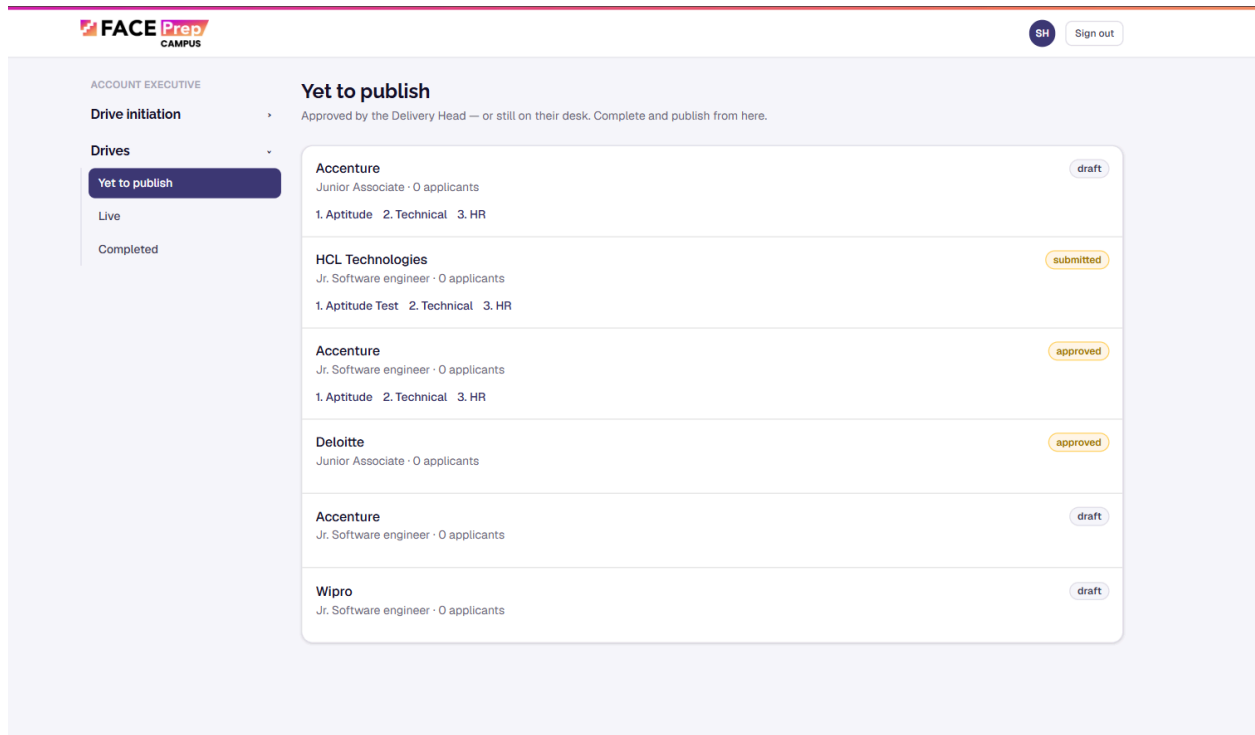

Contact name:

Contact email:

The screenshot shows a web form titled "Selection process and timeline". It contains several input fields and buttons. At the top, there are two dropdown menus: "Drive mode" with a "Select..." placeholder and a "Drive type" with "Internship (convertible)" selected. Below these is a section "Rounds in the process" with a note "In order — e.g. Round 1 Aptitude test, Round 2 Technical interview." and a dashed "Add round" button. Next is a "Tentative drive date" field with a "dd-mm-yyyy" placeholder and a calendar icon. At the bottom of the form is a section "Offer rollout and joining" with two radio buttons: "Immediate joining" (selected) and "Joining later". Below the form are two buttons: "Submit for approval" (dark blue) and "Save draft" (light grey).

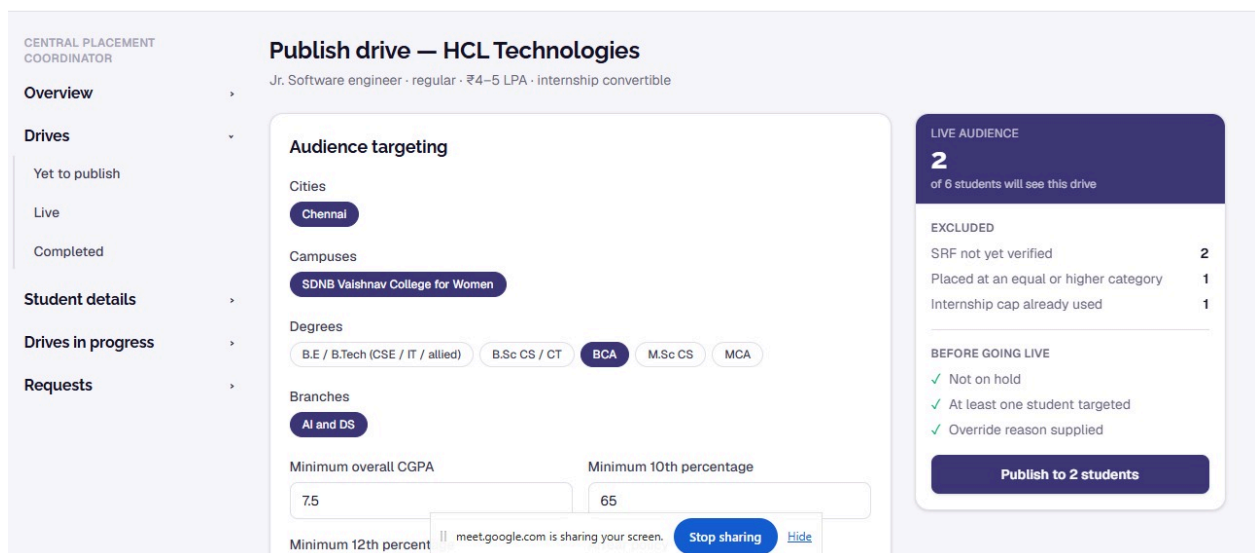

2. Drives Management

- **Drafts not clearing after publish** Once a drive is submitted/published, it should disappear from the drafts list. Currently the draft remains visible even after going live. This affects the CPC, Account Executive, and Delivery Head views; all three need to be fixed.
- **Only one button is clickable** In the drives section, "Complete and Publish" is currently the only clickable action, and the only way to open a drive. All buttons in this section should be functional.
- **Needs design decision Old drives visible to disqualified students** Older drives remain visible to students even after they've been disqualified. We need to decide whether and how these should be cleared from the student's view.

3. CPC Publish-Drive View

Role and compensation details lack visual prominence In the CPC's publish flow, role and compensation details currently appear as a small heading beneath "Publish Drive." This needs to be more prominent either restyled or moved into its own dedicated section.

4. Student Placement Status

Placed student (Thanush) still shown as "Not Placed" Thanush has been placed and his off-campus offer was approved by his campus placement coordinator, but he still appears under "Not Placed" in the All Students view.

Additionally, Allow eligibility for higher CTC categories after placement Currently, once a student (e.g. "Shashwathi test") is placed, their status shows green and they appear locked out. Placed students should still be able to appear in drives for higher CTC categories than their current placement (Regular → Dream → Super Dream progression).

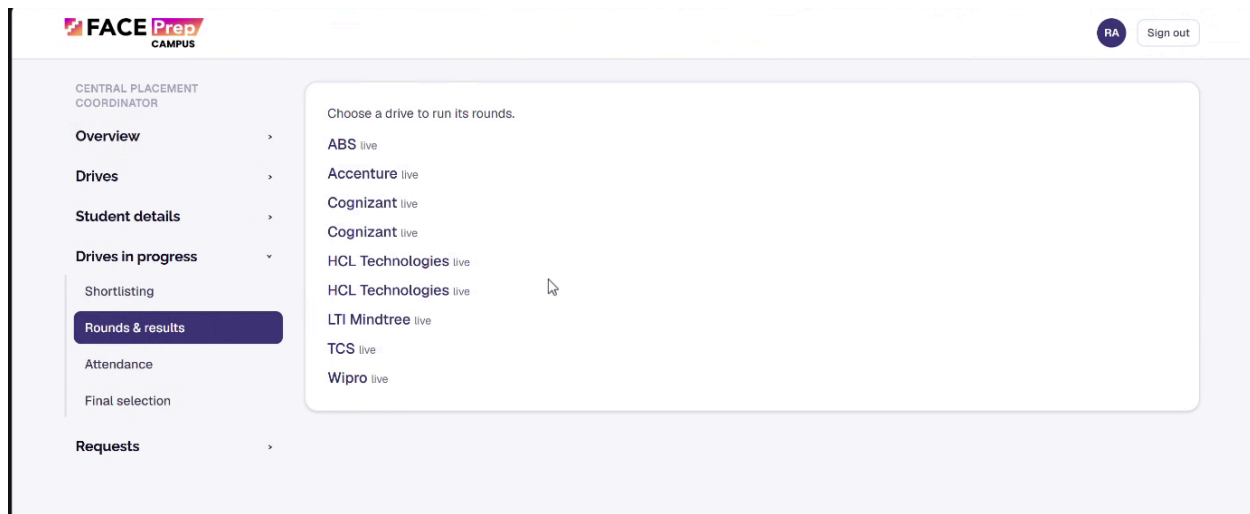

The screenshot shows the FACE Prep CAMPUS interface. The user is logged in as RA. The page title is 'Students' with a subtitle 'Everyone in the placement process, and what became of them.' There is an 'Export 1 to CSV' button. The left sidebar contains navigation links: Overview, Drives, Student details, All students (selected), Skill repository, Drives in progress, and Requests. The main content area shows a search bar with the text 'than' and a filter bar with buttons for 'All students', 'Placed', 'Not placed', and 'Opted out'. Below the filter bar, it says 'Showing 1 students of 106 · 1 placed · 105 not placed'. A table lists the student details:

STUDENT	CAMPUS	REGISTRATION	APPLICATIONS	PLACEMENT
Thanush Krishna 124	SDNB Vaishnav College for Women BCA AI and DS - 2027	Verified	2	Not placed

The screenshot shows the FACE Prep CAMPUS interface. The user is logged in as RA. The page title is 'Students' with a subtitle 'Everyone in the placement process, and what became of them.' There is an 'Export 1 to CSV' button. The left sidebar contains navigation links: Overview, Drives, Student details, All students (selected), Skill repository, Drives in progress, and Requests. The main content area shows a search bar with the text 'Name, roll number, company...' and a filter bar with buttons for 'All students', 'Placed' (selected), 'Not placed', and 'Opted out'. Below the filter bar, it says 'Showing 1 students of 106 · 1 placed · 105 not placed'. A table lists the student details:

STUDENT	CAMPUS	REGISTRATION	APPLICATIONS	PLACEMENT
Shashwathi Test 9676543	SDNB Vaishnav College for Women BCA AI and DS - 2026	Verified	3	HCL Technologies Jr. Developer - ₹5 LPA - Dream

- **Distinguishing duplicate company entries** When a company runs multiple drives, its name appears twice in listings with no way to tell them apart. Add identifiers per entry such as **drive publish date, role, and compensation** so coordinators can distinguish and publish the correct drive

5. Student Eligibility & Shortlisting

Match drives to job-type preference Students should only see drives matching the job-type preference set in the PIF.

Auto-fetch preferred resume and skillset : A student's preferred resume and skillset type should auto-populate when they apply to a drive.

Profile update rules Students should be able to update their area of interest/skills, but:

- Changes should apply only to *future* drives, not retroactively.
- Updates should require campus manager approval before taking effect.

Manual shortlist count Add a manual number-input field so the CPC can set a specific shortlist count for a drive.

Skill repository column headers Column headings in the skill repository should freeze/stick, since they currently disappear when the CPC scrolls down.

Bulk selection for shortlisting Add a checkbox per student plus a "Select All" option at the top of the shortlisting page.

Ranking and rationale are internal and are **never shown to students**. The order is advisory — your selection is what is recorded. Saving **notifies the shortlisted students and schedules them for Round 1.**

Status	Name	Institution	CGPA	Remarks
☐	1. Ishwarya Krishnamurthy	SDN27008	- CGPA 0	CGPA 0 of 10. No specific skills required for this role. No arrears. Did not list this role category as a preference.
☐	2. Selva Rajagopal	TAK27015	- CGPA 0	CGPA 0 of 10. No specific skills required for this role. No arrears. Did not list this role category as a preference.
☐	3. Kavitha Krishnamurthy	SDN27010	- CGPA 0	

6. Notifications

- **Condensed notification view** Show the top 3–5 notifications with a "Read More" link to a full alerts page.
- **Non-destructive read state** Marking a notification as read should move it down the list rather than permanently deleting it.
- **Timestamps** Display the date on each notification.

7. Selection Process & Round Management

- **Round advancement not enforced linearly** Round progression should be strictly linear with clearly defined buckets. Currently, the CPC can change a student's selection status after they've already advanced, which corrupts results in later rounds.
- **Confirmation step for shortlist/reject actions** Add a confirmation prompt or alert before finalizing a shortlist/reject action, to prevent accidental moves.
- **Proof-of-communication upload** When moving a student to the next round, allow an optional file upload (PDF or screenshot) as proof of company communication (email or message).

- **Editable round details post-creation** Round details (time, mode, interview link) must remain editable after creation, with updates reflected in both the student view and the CPC view.
- **Meeting link distribution for online rounds** Allow a meeting link to be sent per student, or via bulk upload with individual time slots per student.
- **Round schedule notifications** Students should receive round schedule details via portal alert or email integration.

PMS Feedback - 20/08

The screenshot shows the FACE Prep Campus PMS interface. At the top, there's a header with the FACE Prep Campus logo and a 'Sign out' button. Below the header, a sidebar on the left lists navigation options: Overview, Drive approval, Drives, Yet to publish (highlighted), Live, and Completed. The main content area is titled 'Yet to publish' and includes a sub-header 'Approved by the Delivery Head — or still on their desk. Complete and publish from here.' Below this, a list of job drives is displayed. Each drive entry includes the company name, job title, salary range, number of applicants, and a status tag (submitted, draft, or approved). A 'View drive' link is provided for each entry.

Company	Job Title	Salary Range	Applicants	Status	Action
Accenture	Jr. Software engineer	₹4-5 LPA	0	submitted	View drive
Accenture	Junior Associate	₹3-3.98 LPA	0	draft	View drive
Accenture	Jr. Software engineer	₹5-10 LPA	0	approved	View drive
Deloitte	Junior Associate	₹4-5 LPA	0	approved	View drive
Accenture	Jr. Software engineer	₹4-6 LPA	0	draft	View drive
Wipro	Jr. Software engineer	₹4-5 LPA	0	draft	View drive

1. Delivery Head and Central Placement Coordinator : Yet to Publish

- No date stamp on any drive can't tell how old a submission is or how long it's been pending approval. A simple "raised on" date, plus a "days pending" flag for anything sitting too long, would fix this.
- No sort by status or age can't pull up "oldest submitted first," which is the natural way to clear a backlog.
- No approve/reject action from the list every drive needs a click into "View drive" even for the one action (approve) this whole screen exists for.
- Suggest auto-archiving drives once their application deadline passes, so expired drives don't clutter the active list.

Choose the type first — the compensation fields follow from it.

Company details

Company name

Industry / domain

Company website

Company contacts

Who the placement team reaches at the company. All optional — add as many as you have.

No contact added — the Central Placement Coordinator will be the point of contact for this company.

+ Add a contact

Role details

Role title

One interview process, however many designations — one PIF.

If the recruiter runs a separate interview process for another designation, raise a separate PIF for it. Two PIFs for one process would double the drive, the shortlist and the audience count.

Add another designation

Role category

Number of openings

2. **No required-field markers anywhere on the form.** There's no way to tell which fields (company name, industry, website, role details, etc.) are mandatory versus optional. As a result, drives can be submitted and pushed through for approval with thin or missing company data; nothing stops an incomplete PIF from going to the Delivery Head.

3. Student : Home / Dashboard

- Notifications only appear as a preview block on the dashboard, with no dedicated, consolidated notifications page reachable from the sidebar. Suggest adding a "Notifications" item (or bell icon) with a full, filterable log.

5. Central Placement Coordinator : Shortlisting

- When shortlisting, the required skills for a role are shown, but the student's actual skills aren't; it only displays "Scored on 0 of 1 required skills," giving no visibility into what the student actually has.

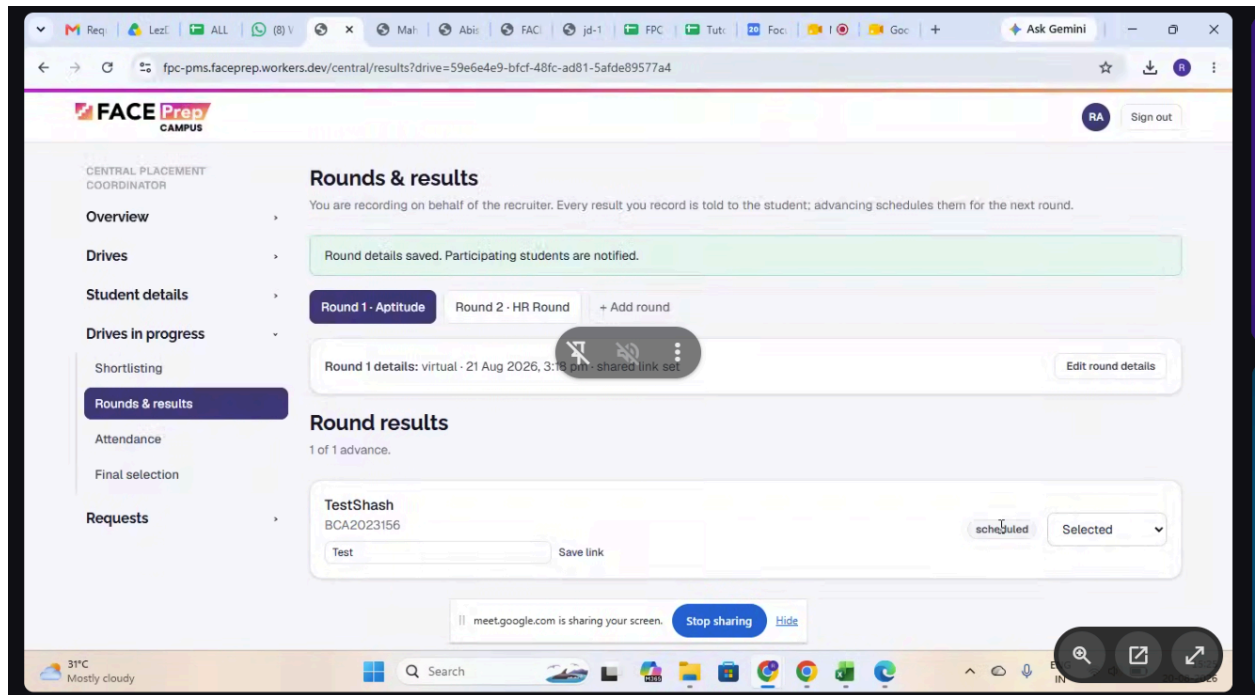

- Add a date identifier (raised-on or applications-close date) and role/CTC next to each drive name in this list, so entries are distinguishable at a glance.
- Group or filter by age/status e.g., a way to collapse or de-prioritize old "applications closed" drives (especially placeholder/test entries like the Dummy Drives) so the coordinator's working list stays focused on active drives needing action.

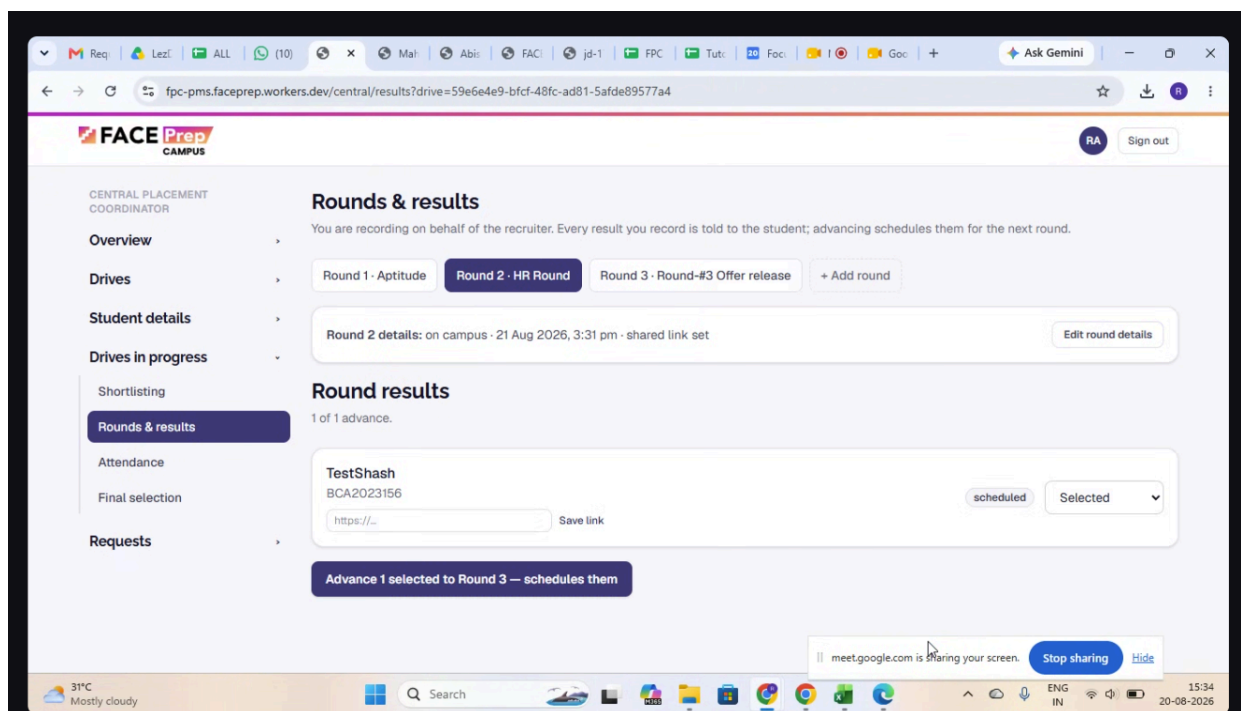

6. Central Placement Coordinator : Rounds & Results

- No "Advance to Round 2" button available, no way to progress a candidate to the next round from this section.
- When setting round mode to "Physical, outside campus," the field still says "Link" instead of switching to "Venue" ; this needs to change so an address can be entered instead of a URL.

Round details remain editable even after a drive is completed and a student has been selected. Round details should freeze once students begin participating in interview rounds, to prevent retroactive changes to a closed process.

7. Central Placement Coordinator : Student Records

Student numbers/counts aren't clickable, and there's no way to drill into student details from that view.

21/08 - PMS Feedback

drives not reflecting in student view

Issue

A drive published under the **Dream** category does not appear in the student's "To apply" list even though the student is placed under **Regular**, and the platform explicitly states that drives in higher categories should remain open and appear in "To apply" as they come.

Observation

- Tested with HCL Technologies (Dream, ₹4–5 LPA), did not reflect.
- Retested by publishing a second, separate Dream drive, still did not reflect. (Dream, ₹6–7 LPA)
- This rules out a one-off glitch; the issue is consistent across multiple Dream drives.

The screenshot shows the 'Drives' section for a student. The left sidebar has a 'STUDENT' header and a menu with 'Home', 'Drives', 'My record', and 'Requests'. The 'Drives' menu item is highlighted. The main content area is titled 'Drives' and contains a message: 'You are placed — Regular. Drives in higher categories remain open to you and appear in "To apply" as they come.' Below this message are four filter buttons: 'To apply (0)', 'In progress (4)', 'Not applied - closed (1)', and 'Applied - closed (1)'. At the bottom, there are four dropdown filters: 'Company or role', 'All locations', 'All role areas', and 'Any closing time'. A final message states: 'No drives are open to you right now. You will be notified when one is.'

The screenshot shows the 'HCL Technologies — Jr. Software engineer' drive details for a delivery head. The left sidebar has a 'DELIVERY HEAD' header and a menu with 'Overview', 'Drive approval', and 'Drives'. The 'Overview' menu item is highlighted. The main content area is titled 'HCL Technologies — Jr. Software engineer' and contains a 'Software / Technical' category. Below this are three tabs: 'LIVE', 'Dream', and 'internship convertible'. The 'LIVE' tab is selected. The main content area is divided into two columns. The left column is titled 'COMPENSATION' and contains a table with the following data:

CTC	BREAKUP
₹4–5 LPA	30000 (fixed) + 5000 (variable)
BOND / SERVICE AGREEMENT	OPENINGS
2 Years	15

The right column is titled 'WHERE AND WHEN' and contains a table with the following data:

In the PIF, when an Account Executive marks a drive as **off-campus**, there is no field to capture the venue. This information is currently missing from the form entirely.

Requirement

- Add a **Venue** field to the PIF, applicable when the drive mode is off-campus.
- Since the venue may not always be finalized at the time of PIF creation, include a dropdown/placeholder option such as **"Venue not yet confirmed"**, so the AE isn't blocked from submitting the form.
- The **Central Placement Coordinator** should then be able to follow up with the company and update the venue once confirmed, this field should remain editable post-submission by the CPC role.
